Emergency Preparedness / Training and Exercise Program

We would be happy to assist you in the development of a progressive training and exercise program that would assist your organization in providing the best emergency preparedness available. In today’s environment of random acts of violence evidenced by active shooter incidents, bombings, and chemical releases intended to harm innocent people you cannot be too prepared. We are prepared to help you.

Why Select Us

We are not a consulting company working to make a profit. The cost of producing an exercise or providing training for you is based on our direct costs (no profit). You are getting a much bigger bang for your dollar.

We use our in-house staff, graphics, GIS, and any other resources that we need to develop the best exercise/training for you. And all provided at the direct cost of doing the scope of work. We are a government organization and are a Not for Profit agency.

An emergency exercise not only tests your capabilities but also demonstrates to your clients, staff, and community that you care about their wellbeing, health, and safety.
