Measure Tool

Measurement Functions:

- miles

Measurement Result:

7.88 miles

Interactive Map Tools
The Map Legend feature allows you to toggle on/off any layers that you want to display using the check boxes.

Map Legend Feature
The Information feature allows the user to obtain attribute information for specific map features at certain scales, and to highlight them on the map.
The Search by Location feature allows the user to search for a specific address which will be displayed with a location marker on the map.
The Search by Attribute feature allows the user to search for a specific feature in a map layer based on the attributes defined in the search value box. The map will automatically zoom to the selected feature(s) which can also be highlighted by the user.
The Graphic Markup feature allows the user to draw specific features on top of the map such as points, lines, and polygons.

The Graphic Themes menu allows the user to define the color pallet for the specific graphics to be drawn on the map.
The Create PDF feature allows the user to create a static PDF map of the current extent that includes all layers, legend, graphics and selections present on the screen at the time of export.
